

# How To Play!

1. Divide into 2 teams: Team A & Team B.
2. Choose one person from each team to be the “contestant”.
3. Everyone else on your team is “your class”.
4. Before selecting a question, the contestant chooses a classmate to help them for that question.
5. Alternate between Teams.
6. On your turn, choose a question to answer from your “test”.
6. Listen to the question, then you have two choices: You may either answer the question (lock in your answer by writing it on your whiteboard) OR you may choose to use a “CHEAT”.
7. After you have determined your “locked-in” answer see if you are correct using the next button. If you are correct the game continues.
8. If you are incorrect and you did not use a “peek” or “copy”, then your chosen classmate can “save” you if they have the correct answer written on their whiteboard. If they are correct the game continues.
9. Note: all students must have their answers locked in on their whiteboards before the answer is revealed.

# How to “CHEAT”

- PEEK – You may look at your selected student’s answer before answering, but you must answer immediately after peeking.
- COPY – You may copy the answer of your selected student. You must use their answer.
- SAVE – If you get an answer wrong your selected student can save you if they have the correct answer written down.
